# ATHARVA NAIKODI

**MECHANICAL ENGINEERING | AUTOMOTIVE | DESIGN & MANUFACTURING**

Pune, Maharashtra, India
Email: atharvanaikodi1@gmail.com
LinkedIn: linkedin.com/in/atharva-naikodi-621635252

## PROFESSIONAL SUMMARY

Final-year B.Tech Mechanical Engineering student at MIT ADT University, Pune, with a specialization in AI and Robotics and hands-on exposure to automotive service, manufacturing operations, and commercial-vehicle homologation. Interested in automotive engineering, mechanical design, product development, and manufacturing. Familiar with Fusion 360 and Solid Edge, with a practical, learning-focused approach to engineering problems.

## INDUSTRIAL EXPERIENCE

### Engineering Intern – Homologation | Tata Motors

*Pimpri, Pune • Current six-month internship*

- Learning about commercial-vehicle homologation, automotive regulations, technical standards, vehicle classifications, and compliance documentation.
- Building familiarity with how engineering teams interpret requirements and coordinate regulatory compliance and testing.

### Automotive Service & Maintenance Trainee | Mercedes-Benz Silver Star Workshop

*Wagholi, Pune • 2 months*

- Gained workshop exposure to vehicle inspection, diagnostics, wheel alignment, tyre checks, air-conditioning servicing, and maintenance workflows.
- Observed coordination between service advisors and technicians during vehicle evaluation and repair processes.

### Manufacturing Intern / Trainee | Ankur Enterprises Ltd.

*1 month*

- Gained exposure to CNC/VMC machines, conventional lathe operations, and hand presses.
- Learned the fundamentals of turning, milling, drilling, boring, chamfering, grinding, and knurling.

## SELECTED ENGINEERING PROJECTS

**Urjastrot – Biomass Pellet Manufacturing Machine**
Machine for manufacturing biomass pellets, connecting mechanical systems and manufacturing processes with the use of biomass as a fuel resource.

**Battery-Operated Electric Weeder**
Explored the integration of a battery, electric motor, and cutting mechanism for weed removal, including a reverse-motion concept to help clear the machine if weeds became stuck around the blade.

**Pedal-Operated Hacksaw**
Studied a manually powered cutting mechanism that converts pedal motion into reciprocating hacksaw movement, applying principles of linkages and mechanical power transmission.

## EDUCATION

### B.Tech, Mechanical Engineering (AI & Robotics specialization) | MIT ADT University, Pune

*Expected graduation: 2027*

## TECHNICAL SKILLS

| | |
|---|---|
| **CAD** | Autodesk Fusion 360, Solid Edge; 3D modelling and mechanical mechanisms |
| **Manufacturing** | CNC/VMC exposure, lathe operations, machining-process fundamentals |
| **Automotive** | Vehicle maintenance exposure, homologation fundamentals, automotive standards and compliance |
| **Other** | Robotics fundamentals, teamwork, communication, problem-solving |

## CERTIFICATIONS & TRAINING

- Industrial Robotics and Automation Training Program — Godrej Enterprises Group (Apr 2026)
- Introduction to Generative AI: Art of the Possible — AWS (Dec 2025)
- Fundamentals of Robotics & Industrial Automation — L&T EduTech (Feb 2025)
- Google Prompting Essentials — Google (Feb 2025)
